VITYARTI-PROJECT

“Digital Literacy Project Report”

NAME :- KEVAL BHARATKUMAR PATEL

REG. NO. :- 25BAI10207

Introduction

Digital literacy is a crucial skill in today's technology-driven world, enabling individuals to effectively use digital tools, platforms, and communication systems. This project was undertaken to enhance awareness and develop practical skills required for responsible digital participation. It focuses on key aspects such as online safety, digital communication, professional presence, and cybersecurity.

Through a series of structured tasks, I explored various platforms including Canva, GitHub, LinkedIn, Kaggle, and HackerRank. Each task provided hands-on experience in using digital tools efficiently and responsibly. The project also emphasized the importance of safe online practices, professional etiquette, and awareness of cyber threats. Overall, this project helped me build a strong foundation in digital literacy and prepared me for academic and professional digital environments.

Task-1 Write-up

In this task, I created a digital literacy awareness infographic using Canva. Canva is a user-friendly design platform that provides various templates, icons, and customization features. It allowed me to present information in a visually appealing and structured way without requiring advanced design skills.

The infographic focused on explaining the concept of digital literacy, including key areas such as safe internet usage, digital tools for students, and maintaining a professional online presence. I used colors, icons, and sections to make the content engaging and easy to understand.

One important learning from this task was understanding how visual elements can improve communication. I also learned how to organize content effectively so that it is informative yet not overwhelming. However, balancing design and content was slightly challenging, as adding too much information could make the design cluttered.

Overall, this task enhanced my creativity, improved my design skills, and helped me understand the importance of visual communication in spreading awareness.

Task-2 Write-up

In this task, I created and updated my digital portfolio on platforms such as LinkedIn, GitHub, and Kaggle. Each platform serves a unique purpose in academic and professional growth. LinkedIn helps in building a professional network and showcasing

achievements, GitHub is used for sharing projects and managing code, and Kaggle provides opportunities to practice data science and machine learning.

By setting up these platforms, I took the first step towards building a strong online presence. I plan to regularly update my GitHub with projects, connect with professionals on LinkedIn, and participate in Kaggle competitions to improve my skills.

This task helped me understand the importance of maintaining a digital identity in today's competitive world. It also made me realize that consistent effort over time is required to build a strong portfolio.

In the future, I aim to actively use these platforms to learn from the community, collaborate on projects, and showcase my skills to potential recruiters.

Task-3 Write-up

In this task, I explored coding and collaboration platforms to improve my technical and problem-solving skills. I practiced coding on HackerRank, where I solved problems related to logic building and programming fundamentals. This helped me improve my analytical thinking and coding efficiency.

Additionally, I created a digital literacy quiz using Google Forms. This included multiple-choice and short-answer questions based on topics such as cybersecurity, strong passwords, and safe internet practices. I also learned how to enable quiz settings, assign marks, and manage responses efficiently.

This task demonstrated how digital tools can be used not only for learning but also for assessment and collaboration. Google Forms proved to be an effective platform for creating interactive and structured content.

Overall, this experience enhanced my technical skills and introduced me to practical ways of using digital platforms for educational purposes. It also improved my confidence in using online tools for both learning and evaluation.

Task-4 Write-up

This task focused on professional communication and digital etiquette. I learned how improper communication can lead to misunderstandings, especially in academic or team-based environments. For example, unclear instructions or incomplete messages can result in missed deadlines or confusion among team members.

To avoid such issues, it is important to use clear language, provide complete information, and confirm understanding. I also practiced writing professional emails, such as requesting an assignment extension and applying for internships.

This task improved my communication skills and made me more aware of the importance of clarity, tone, and professionalism in digital interactions.

Task-5 Write-up

In this task, I learned about UPI frauds and online scams. What surprised me most was how easily people can fall victim to simple tricks like phishing messages and fake payment requests. Many scams do not require advanced hacking but instead exploit lack of awareness.

This task made me realize the importance of being cautious while using digital payment systems. I will ensure that I verify links before clicking, double-check payment requests, and never share sensitive information such as OTPs or PINs.

Overall, this task increased my awareness of cybersecurity risks and encouraged me to adopt safer digital habits.

Conclusion

This Digital Literacy project provided valuable insights into essential digital skills required in modern academic and professional environments. Through various tasks, I gained practical experience in designing content, building a digital portfolio, coding, and understanding cybersecurity.

The project enhanced my awareness of responsible digital behavior and improved my communication and technical skills. It also introduced me to important platforms that will support my future growth.

In conclusion, this project has strengthened my digital competence and prepared me to use technology effectively, safely, and professionally
